Requests for Change Notifications and/or Supplier Agreements for Standard Catalog Product

This policy applies to standard products sold by Reell Precision Manufacturing as available or advertised on our website. It addresses requests for “pre-notification” of product/process changes and requests by customers to enter into a “supplier legal agreement” with Reell.

Reell Precision Manufacturing standard products are sold under a single catalog part number to multiple customers worldwide. No single customer has design control of the product. It is not feasible or cost effective for Reell to enter into a specific supplier legal agreement or an agreement where pre-notification of product/process changes is required for these products.

It is Reell’s standard practice to review all changes made to Fit, Form or Function on standard products that we believe may impact our customers and to inform them accordingly via a Product Change Notification (PCN).

If customer change notification requirements or supplier legal agreement requirements go beyond being informed of Fit, Form or Function changes, please contact Reell to explore setting up a custom part number for your application. An additional administrative cost may be incurred in order to meet your specific requirements.

A handwritten signature in black ink, appearing to read "Steve Bromenshenkel".
