

Safety & Health Policy

Reell Precision Manufacturing is committed to a safe and healthy working environment by protecting the safety and health of its employees and visitors when carrying out its operations.

Our safety management system has been set up in such a way that they achieve the greatest possible safety and the best possible protection of health and well-being, with the ultimate goal of preventing accidents and absenteeism.

To achieve these goals, Reell will set measurable objectives and targets for continuous improvement as well as ensuring an open communication with all employees through awareness, education, training, mutual consultation and participation.

This policy can only succeed if all those involved contribute. The management assumes that all employees try to work in a safe and healthy way, and that they adhere to the applicable safety.

Kyle E. Smith
CEO & President
