

PFAS Declaration

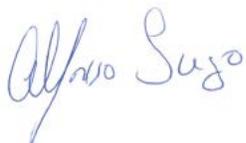

(compliance date: September 2024)

Based on our production knowledge and declarations collected from our upstream supply chain, we hereby declare that our products do not contain any intentionally added per- and polyfluorinated substances (PFAS) such as perfluorooctanoic acid (PFOA), perfluorooctanesulfonic acid (PFOS) or long-chain perfluorocarboxylic acid (LC-PFCA). The term “intentionally added” means a chemical in a product that serves an intended function in the product component.

We also confirm that products supplied to our customers do not exceed current regulatory limits for Europe, United States and many Asian countries with respect to the C8 (and higher) short-chain PFAS chemicals, perfluorooctanoic acid (PFOA) or perfluorooctanesulfonic acid (PFOS), their salts and related compounds.

We understand that PFAS are persistent, pervasive and bio-accumulative in the environment and can generate adverse effects on human health. Therefore, Reell has taken proactive measures to ensure our products comply with ongoing legislative effort in PFAS. We are committed to monitoring and improving our material compliance process to ensure our products are compliant.

Reell is committed to compliance with government regulations and industry standards for the environmental health and protection, as well as continually striving to meet the needs of our customers. It is the obligation of the recipient of our products to ensure that any exclusive rights, existing laws and legislation are respected.
